

Arrowsmith PROGRAM

Strengthening Learning Capacities™

ADDRESSING LEARNING DIFFICULTIES A Cognitive Approach

Presentation by:
**Debbie Gilmore, Executive Director
of Arrowsmith Program**

Learning difficulties do not have to be lifelong. A cognitive program can identify and strengthen the underlying causes of learning difficulties, using the principles of neuroplasticity.

Date: November 26, 2018

Time: 16:00

Location:
Tallinn University
Narva maantee 25
Room M523
10120 Tallinn
Estonia

In this presentation, Debbie will describe a number of learning difficulties, from those that impact the learner in school as well as in daily life. The focus will be on learning difficulties that impact academic performance, such as reading and writing, and some of the research studies demonstrating brain-related change and enhanced cognitive and academic performance as a result of engaging in a cognitive approach to addressing learning difficulties.
