

Arrowsmith PROGRAM

Strengthening Learning Capacities™

ADDRESSING LEARNING DIFFICULTIES A Cognitive Approach

Presentation by:
**Debbie Gilmore, Executive Director
of Arrowsmith Program**

Learning difficulties do not have to be lifelong. A cognitive program can identify and strengthen the underlying causes of learning difficulties, using the principles of neuroplasticity.

Date: December 3, 2018

Time: 17h30

Location:

International School of Palermo
Centro Educativo Ignaziano
Via Piersanti Mattarella 38/42
90141 Palermo
Italy

In this presentation, Debbie will describe a number of learning difficulties, from those that impact the learner in school as well as in daily life. The focus will be on learning difficulties that impact academic performance, such as reading and writing, and some of the research studies demonstrating brain-related change and enhanced cognitive and academic performance as a result of engaging in a cognitive approach to addressing learning difficulties.
