ADDRESSING LEARNING DIFFICULTIES
A Cognitive Approach

Presentation by:
Debbie Gilmore, Executive Director of Arrowsmith Program

Learning difficulties do not have to be lifelong. A cognitive program can identify and strengthen the underlying causes of learning difficulties, using the principles of neuroplasticity.

Date: February 15, 2019
Time: 9:00am
Attendees are invited to visit the Arrowsmith Program classroom following the presentation.

Location:
Dallas Christian School
1515 Republic Pkwy
Mesquite TX 75150

In this presentation, Debbie will describe a number of learning difficulties, from those that impact the learner in school as well as in daily life. The focus will be on learning difficulties that impact academic performance, such as reading and writing, and some of the research studies demonstrating brain-related change and enhanced cognitive and academic performance as a result of engaging in a cognitive approach to addressing learning difficulties.
