

# Arrowsmith PROGRAM

*Strengthening Learning Capacities™*

## ADDRESSING LEARNING DIFFICULTIES A Cognitive Approach

**Presentation by:**  
**Debbie Gilmore, Executive Director  
of Arrowsmith Program**

Learning difficulties do not have to be lifelong. A cognitive program can identify and strengthen the underlying causes of learning difficulties, using the principles of neuroplasticity.

**Date:** February 13, 2019

**Time:** 4:00pm

**Location:**  
Rice University  
6100 Main St.  
Herzstein Hall (HRZ 210)  
Houston, Texas 77005

In this presentation, Debbie will describe a number of learning difficulties, from those that impact the learner in school as well as in daily life. The focus will be on learning difficulties that impact academic performance, such as reading and writing, and some of the research studies demonstrating brain-related change and enhanced cognitive and academic performance as a result of engaging in a cognitive approach to addressing learning difficulties.
